Splitting a slide into columns

The line you are reading goes all the way across the slide. From the left margin to the right margin. Now we are going to split the slide into two columns.

Here is the first column. We put an itemized list in it.

- This is an item
- This is another item
- Yet another item

Here is the second column. We will put a picture in it.

The line you are reading goes all the way across the slide. From the left margin to the right margin.
